

AMIN SHAHROKHI

FULL-STACK DESIGNER AND DEVELOPER

I started drawing in 1984; when I was one of the tiniest fans of art! Then started learning realism and impressionism painting with oil color 10 years later. My interest in painting, caused relationships with other arts like music, poetry, etc. By the way, I knew painting as my primary art and it made me decide to choose it as my job many years ago. So, Photoshop and Illustrator came onboard and after a period of practicing, I started working as a graphic designer in printing

and publishing companies for 2 years and in 2008, 4 years after I started my graphic design job and learnign web technologies beside that, my skills helped me upgrade my position from a graphic designer to a web designer and developer. I never stopped learning and always have been dealing with a new technology. Now, it's years that I'm working as a freelancer on graphic design, 3D and web/app development projects with around the world.

SKILLS

Drawing	HTML5	JavaScript	PHP	SEO
Painting	CSS	jQuery	Laravel	Marketing
Photoshop	LESS	AJAX	Python	WordPress
